

Natutec Scout scanner protocol

This protocol will help you to use Natutec Scout scanner in the best possible way. If you follow the protocol, we guarantee a user-friendly and reliable scanner.

- 1** Use the scanner with sufficient natural light (2 hours after sunrise, 2 hours before sunset)

- 2** Prevent glare on the Horiver card

- 3** Only use Horiver sticky traps

- 4** Don't bend the cards

- 5** Replace cards when you have approximately 30 whiteflies per side
